Dear HR Manager,

I was interested in the vacancy for the position of Frontend developer . I have completed courses from the company GoIT - "Full Stack Developer". I believe that my professional experience and personal qualities best meet the requirements described in the vacancy.

On the courses, such languages as CSS3, SASS, HTML5, JavaScript were studied, and many libraries were studied both on the courses and after them: React, Redux, React-redux, Redux-Persist, Redux/toolkit, Lodash, Axios, Emotion/styled , Formik, Material UI, React Bootstrap, React-i18next , Yup and also studied the Next.js framework. On the backend, I studied Node.js with the MongoDB database.

For more detailed information, you can view my GitHub - <https://github.com/Yborline>

I continue to develop my skills, but in order to be more effective, it is necessary to constantly work in this area, to devote the maximum of my time to it.

I really want to get a job in the IT field. For this, I am ready to make maximum efforts: both for the growth of my knowledge and for the perspective of your company. I also agree to do an internship without any problems.

Thank you for your attention to my resume. I would appreciate the opportunity to meet with you personally for an interview, where I can talk in more detail about my experience and suggest ways to implement my skills for the success of your company.

Sincerely,
Yaroslav Borys
